Purpose

The purpose of this document is to define standards and guidelines for creating, maintaining, and managing project documentation to ensure consistency, accuracy, and proper control.

Scope

This document applies to all project-related documents including BRD, FRD, SOP, RTM, UAT, and other supporting artifacts created during the HRMS project lifecycle.

Document Types

The following documents are maintained as part of the project:

- Business Requirements Document (BRD)
- Functional Requirements Document (FRD)
- Standard Operating Procedure (SOP)
- Requirement Traceability Matrix (RTM)
- User Acceptance Testing (UAT)
- Process Flow Diagrams
- Wireframes and Design Documents

Naming Convention

All documents should follow a standard naming format:

<Project Name>_<Document Type>_v<Version>

Example:

HRMS_BRD_v1.0

HRMS_FRD_v1.0

HRMS_SOP_v1.0

Version Control

Each document must maintain version history to track changes. Any updates to the document should be recorded with version number, date, author, and description of changes.

Access Control

Access to documents should be restricted based on user roles:

- Business Analyst: Create and update documents

- Project Manager: Review and approve documents
- Stakeholders: View access

Review & Approval Process

All documents must go through a review and approval process:

- Document is created by Business Analyst
- Reviewed by Project Manager or Senior Stakeholder
- Approved before final use

Storage & Maintenance

All documents should be stored in a centralized repository such as GitHub, SharePoint, or Confluence. Regular updates and backups should be maintained.

Change Management

Any changes to documents must follow proper change management:

- Changes must be documented
- Version must be updated
- Stakeholders must be informed
